

HOW IS CONCRETE TRANSFORMING  
DESIGN NOW AND IN THE FUTURE?

DEC 2,  
2015

International  
Architectural  
Roundtable

Held Concurrently With:

HOMEBUILDER  
& RENOVATOR EXPO

IIDEXCanada

Sponsored by

Ontario  
Association  
of Architects

Brown Daniels Associates

**bildtec.**

Thames Valley Building Products Ltd.

## TOPIC:

This year's Roundtable will examine innovative applications of concrete in architecture and the urban environment. How is concrete enhancing the aesthetics, sustainability, and community impact of structures? Panellists will also discuss the future of concrete, and how new technologies are transforming the realm of built form.

# SPEAKERS:

## MODERATOR - ELSA LAM

Editor, *Canadian Architect*

Lam holds a doctorate in architectural history and theory from Columbia University, completed under the supervision of Kenneth Frampton and Vittoria di Palma. Lam has written extensively for architecture magazines and collaborated on the editing and writing of several books on design history. Previous to her role at *Canadian Architect*, she worked with the Canadian Centre for Architecture in Montreal.

## BRANDON CLIFFORD

Principal, *Matter Design*, Belluschi Lecturer, MIT

Clifford is dedicated to re-imagining the role of the architect in the digital era. Clifford has been the recipient of accolades including; SOM Prize; Design Biennial Boston; and Architectural League Prize for Young Architects and Designers. Clifford is widely published including; *Metropolis Magazine*; *Fabricate 2014*; *Young Architects 15: Range*; *Performative Materials in Architecture and Design*; and his authored work *Volume: Bringing Surface into Question*.

### FILIPPO GABBIANI

Co-Founder, Kokaistudios

Gabbiani moved their headquartered to Shanghai in 2002 where they work on projects in Asia, the Middle East, Europe and North America. Primarily focused on developing cultural, corporate, commercial, hospitality and retail projects, they have also worked extensively on urban regeneration projects involving the requalification of heritage locations.

### RONALD RAEI

CEO and Co-Founder, Emerging Objects,  
Partner, Rael San Fratello

Working in his creative practice alongside his start-up which focuses on 3D printing, Rael is at the forefront of design innovation. Rael's firm has recently been named an Emerging Voice by The Architectural League of New York. Rael is also an Associate Professor at the University of California, Berkeley with a joint appointment in the departments of Architecture and Art Practice where he is the Director of the PrintFARM — a printing facility for architecture, research and materials.

### BING THOM

Principal, Bing Thom Architects

One of Canada's most esteemed architects, Bing who started his own firm in 1982, lectures internationally and has been recognized by wide range of honours including; the Order of Canada; the Queen's Golden Jubilee Medal for outstanding contributions to architecture and community; Honorary Degree of Laws, Simon Fraser University and the University of British Columbia; Honorary professorship, Tongji University, Shanghai; and the 2011 RAIC Gold Medal.
