

# New In-Class Volunteer Opportunity!

Are you an Architect working in Hamilton, Toronto, Kingston or Ottawa that wants to help educate the next generation on how to build sustainable communities?

**Contact us to sign up!** e-mail us at [edavies@no9.ca](mailto:edavies@no9.ca)

Volunteer Architects in the classroom empower Youth to build sustainable communities. Lend your critical thinking, problem solving, and model building to grades 7-9.

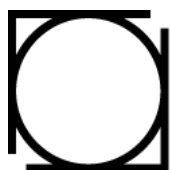

**Architects who participate in no.9's *Imagining My Sustainable Community* program will qualify for structural hours (25) and climate action hours (2) for the OAA's Continuing Education (ConEd) requirements.**

Learn more here: <https://www.no9.ca/imagining-my-sustainable-community>

*Imagining My Sustainable Community* is an award-winning program for grades 7-9 that educates students on the impacts of climate change and the importance of transitioning to a carbon-nuetral economy.

This immersive, experiential program first explores global projects exemplifying the 9 Pillars of Sustainability, and then students collaboratively choose a community site for their project.

IMSC aims to inspire our children to make meaningful, positive environmental impact and empower them to become the civic-minded leaders of the future. Over the last 14 years, IMSC has been delivered to more than 5000 students in schools across Canada!
