

# OAA Headquarters

**Renew  
Refresh  
Project**

\*Update

**July 13, 2018****CONSTRUCTION HIGHLIGHTS: JUNE**

For the OAA Headquarters Renew + Refresh (R+R) Project, this summer's work plan includes the geothermal excavation (see story below) and the HVAC rework.

---

**GROUND SOURCE EXCHANGE SYSTEM – BREAKING NEW GROUND**

The drilling for the geothermal system began in mid-April. This was completed by mid-May, with excavation completed in June. For a full story on the ground source exchange system for the OAA HQ, [click here](#).

See video coverage of the drilling [here](#).

## ART PROGRAM CONSULTATION BEGINS

Congratulations to the team of Carlyle Design Associates and Catherine Williams Fine Art Consultants Inc., which has been awarded the contract to explore options for establishing a purposeful collection of artwork and/or architectural artifacts for display in the renovated building. This summer, the consultants have begun their research and assessment of the current archive of OAA art and artifacts from 111 Moatfield. They will be working with the Art Program Sub-Committee in preparation of the final report, scheduled to be presented to Council at the November meeting.

## BUILDINGS EVOLVE – THE OAA HEADQUARTERS IS NO EXCEPTION A personal look at the original construction of 111 Moatfield

With the OAA Headquarter's retrofit project underway, we thought we'd take a look back at the building's original construction. Architect Ruth Cawker and OAA Building Committee member Jamie Wright both contributed their personal accounts, along with a number of individuals who were interviewed 25 years ago. Be sure to read [this reflection of the building](#) as we embark on its renewal.

## FOLLOW THE COVERAGE

Watch for upcoming coverage of the OAA HQ R+R in *Daily Commercial News*. Media coverage, video and images will also be available on the OAA HQ R+R webpages.
